ADDENDUM

Addendum Number:	04	Dated:	January 29, 2016
Solicitation Number:	IFB No. 802-16-32893		
Solicitation Title:	Marine Services to Obtain, Clean, and Reef a Ship at High Island Ship Reef (HI-A-424)		
DUE DATE:	March 1, 2016		
Purchaser:	Renee Serrano		

PURPOSE OF ADDENDUM: CLARIFICATION

Except as provided herein, all terms and conditions of the document referenced herein, remain unchanged and in full force and effect. The following are specifications to this solicitation. This Addendum shall be attached to and form a part of the referenced solicitation document and any resulting awarded contract, and must be considered in your response.

Specification Clarification

Exhibit F, Technical Proposal:

Respondent to submit the following technical proposal information tabbed Exhibit E. Failure to submit this documentation may result in the proposal being considered non-responsive.

1. Respondent shall submit, as part of their proposal, a **sink plan** with or without the use of explosives that details how respondent will reef the ship in an up-right position on ocean bottom.
2. Respondent shall also submit a **contingency plan** of how respondent will up-right the ship or pull the ship into position so that any list is no more than twenty five (25) degrees.

Evaluation will be based on the Respondent's ability to provide services they propose to provide as indicated in Exhibit C.

Updated Exhibit F, Technical Proposal Requirement Clarification:

Respondent to submit the following technical proposal information tabbed **Exhibit F**. Failure to submit this documentation may result in the proposal being considered non-responsive.

1. Respondent shall submit, as part of their proposal, a sink plan with or without the use of explosives that explains how respondent will reef the ship in an up-right position on ocean bottom. This explanation shall include a general concept of the sinking process, what vessels may be needed, methodology (including whether explosives will be used; general hull modifications and water flow), how the contractor will insure the ship stays on the deployment spot during the sinking, who will inspect the ship after it is reefed, and any other pertinent details that can provide a clear concept to the reviewers of this proposal. A more detailed

sink plan will be required for review by Texas Parks and Wildlife Department (TPWD) once contract is awarded and discussions have taken place between TPWD and Contractor.

2. Respondent shall also submit a contingency plan of how respondent will up-right the ship or pull the ship into position so that any list is no more than twenty five (25) degrees. This plan shall provide enough detail to enable TPWD to insure that Contractor has thought through this process and what vessels and methodology would be used to right the ship if it is listing more than twenty five (25) degrees. TPWD realizes the final contingency plan, if needed, will be dependent on how the ship is oriented on the ocean bottom and will be coordinated between TPWD and Contractor.

Evaluation will be based on the Respondent's ability to provide services they propose to provide as indicated in Exhibit C.

Respondents are to acknowledge receipt of this Addendum. Return a signed copy of this notice with your response submission.

I acknowledge receipt of this addendum.
